The OG Architect

Deconstructing Cultural Iconography into Scalable Design Systems & UI Architecture

Creative Direction • Design Systems • Visual Storytelling • AI Exploration

CAMPAIGN NAME

The
OG
Architect

CENTRAL IDEA

Premise: *Ganesha as the Ultimate System Architect.*

Translation: Deconstructing 108 attributes into auto-layout grids and micro-interactions.

Business Goal: Driving inbound UX audit leads.

AUDIENCE INSIGHT

Founders, PMs, Design Leaders who value system logic

KEY MESSAGE

*Deconstructing the **108 traditional attributes of Ganesha** (Ashtottara Shatanamavali) such as Vighnaharta (remover of obstacles) and Sumukha (harmonious form) and translating them into digital design specs, UX friction removal, and generative AI systems.*

ELEVATOR PITCH

"We deconstructed **Ganesha's traditional attributes from Vighnaharta (UX friction removal) to Sumukha (aesthetic visual systems)** into an AI-assisted design spec, proving that great craft has always been rooted in logic and form."

108 NAMES OF GANESHA

Ashtottara Shatanamavali

TRADITION	PRINCIPLE	DESIGN SYSTEM	TOOL	EXPERIENCE
MODAKPRIYA	FORM	COMPONENTS	FIGMA	TACTILE INTERFACE
VIKATA	STRUCTURE	GRID	AUTO LAYOUT	RESPONSIVE VIEW
NADAPRATISHTHITA	RHYTHM	FEEDBACK	CSS ANIMATION	MICRO-INTERACTION
PADMAKARA	SCALE	MODULAR	DESIGN TOKENS	SYSTEM CLARITY
VIGHNAHARTA	FRICTION	UX	PRODUCT AUDIT	ZERO DROP-OFF

ENGAGEMENT & CONVERSION

Instagram (Interactive Community)

- **Mechanic:** "Match the Attribute" Story Polls
- **Action:** Followers match Ganesha attributes to UI tokens (e.g., *Modakpriya - Grid Tokens*).
- **Incentive:** Instant DM with the **Figma UI System Template.**

LinkedIn (B2B Lead Generation)

- **Mechanic:** "Drop Your UI Friction"
- **Action:** Founders comment their product's worst UX bottleneck in the comments.
- **Incentive:** The design team replies with a 2-frame fix... + CTA for a **Free 15-Min UX System Audit.**

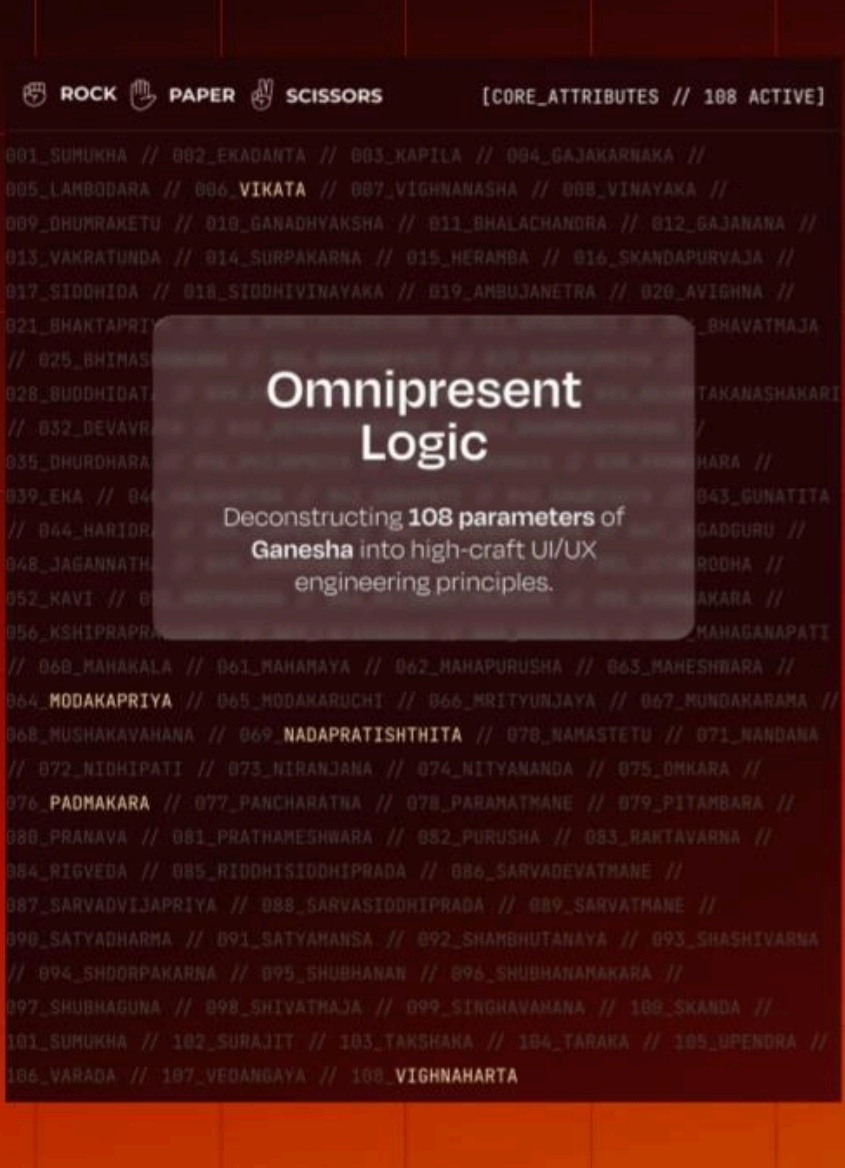
AWARENESS & LEAD ENGINE

Top-Funnel	High-craft carousels hijack festive search traffic, cutting through holiday post noise.
Mid-Funnel	*"Drop Your Friction"* comments build public, real-time engagement with product leaders.
Bottom-Funnel	CTAs convert viewers into inbound leads via a Free 15-Min UX System Audit.

STRATEGIC VALUE & BRAND IMPACT

01	Proves System Authority	Shows our team engineers scalable design systems, not just festive graphics.
02	Human-Led AI	Demonstrates AI speed backed by strict human art direction and brand rules.
03	Cultural Depth	Positions the studio as capable of modernizing complex cultural concepts

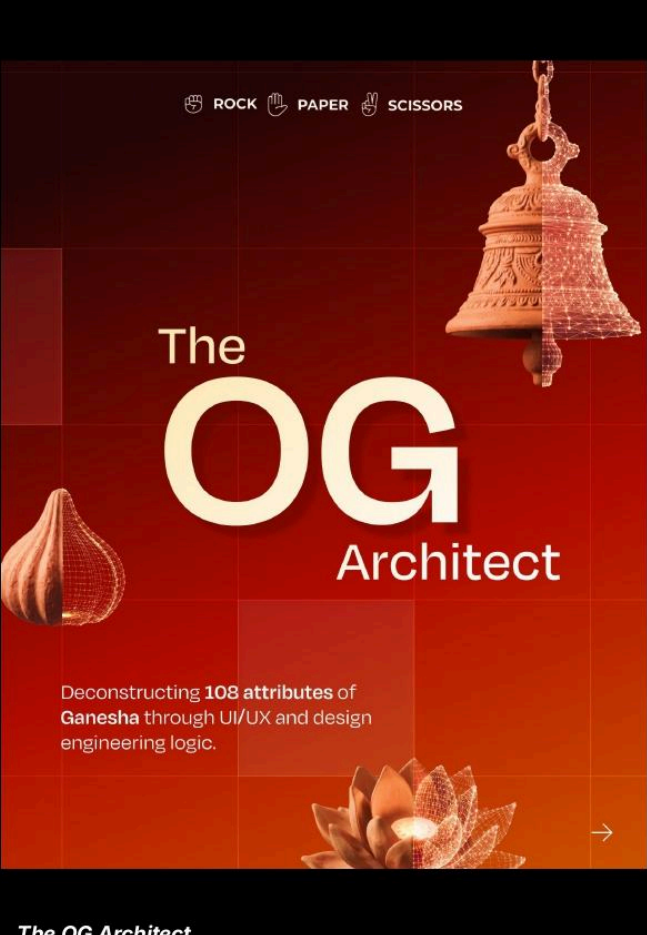
PRE BUZZ POST



ROCK PAPER SCISSORS
[CORE_ATTRIBUTES // 108 ACTIVE]
Omnipresent Logic
Deconstructing 108 parameters of Ganesha into high-craft UI/UX engineering principles.

*A terminal-inspired grid deconstructing **108 Ganesha attributes** into active, code-mapped UI design tokens.*

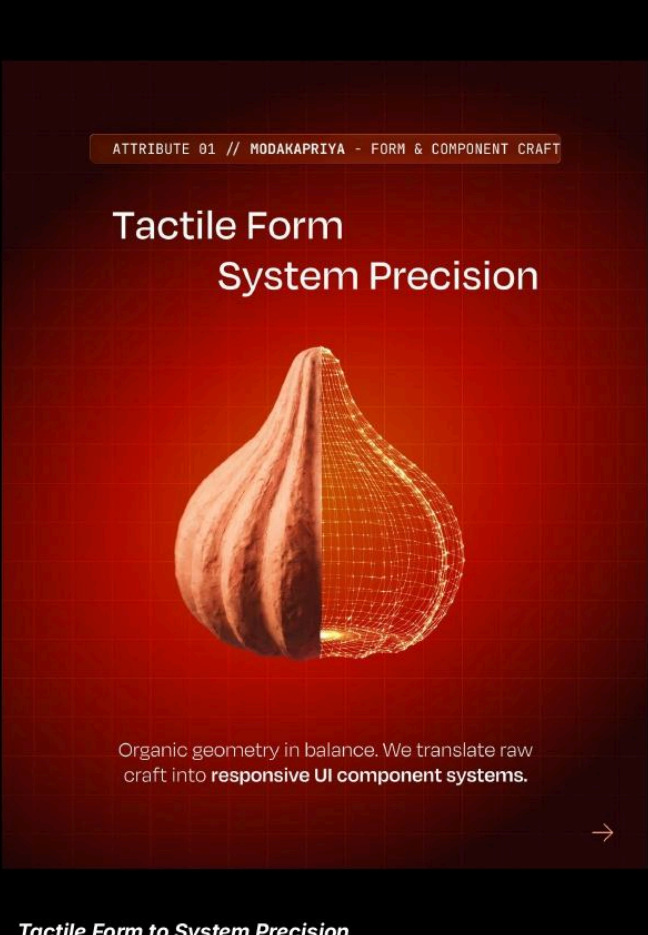
CAROUSEL EXECUTION



ROCK PAPER SCISSORS
The OG Architect
Deconstructing 108 attributes of Ganesha through UI/UX and design engineering logic.

The OG Architect

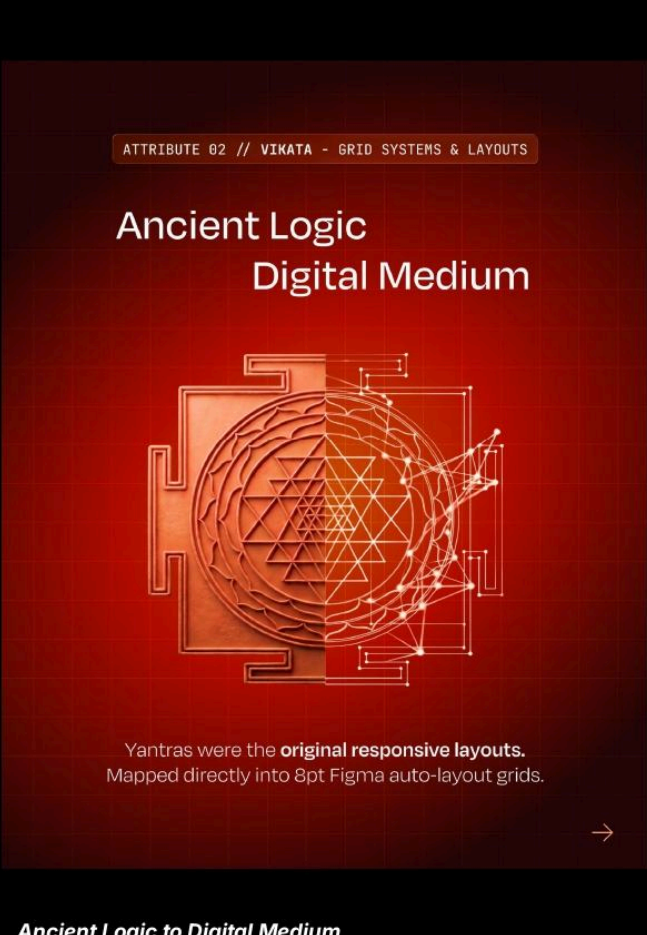
Sacred forms aren't festive decor - they are Bappa's foundational design blueprint.



ATTRIBUTE 01 // MODAKAPRIYA - FORM & COMPONENT CRAFT
Tactile Form
System Precision
Organic geometry in balance. We translate raw craft into responsive UI component systems.

Tactile Form to System Precision

Modak's natural radial geometry mapped directly into responsive Figma auto-layout grids.

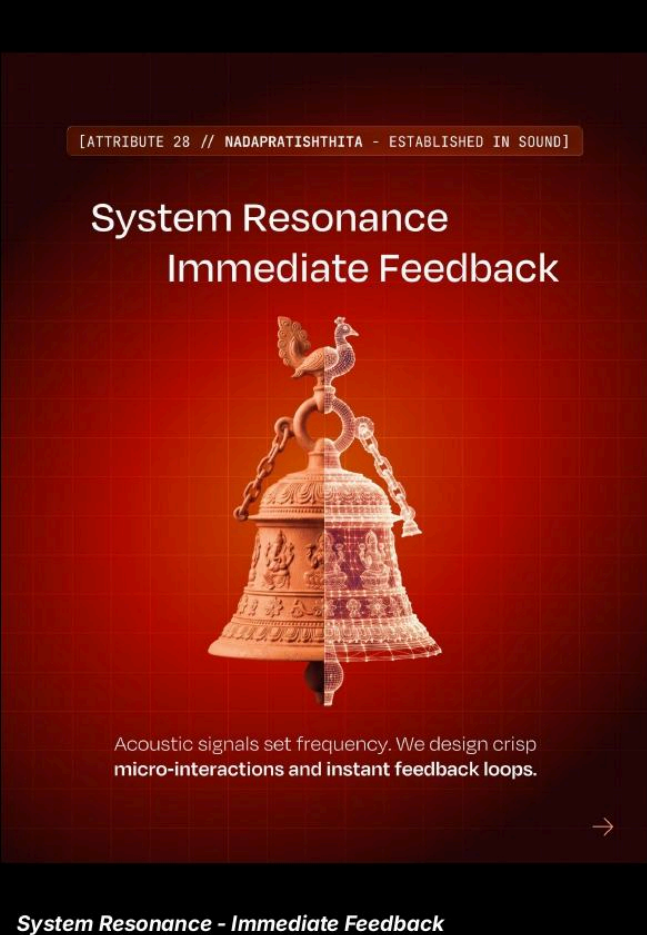


ATTRIBUTE 02 // VIKATA - GRID SYSTEMS & LAYOUTS
Ancient Logic
Digital Medium
Yantras were the original responsive layouts. Mapped directly into 8pt Figma auto-layout grids.

Ancient Logic to Digital Medium

Sacred Yantras were India's first spatial layout systems, guiding modern screen wireframes.

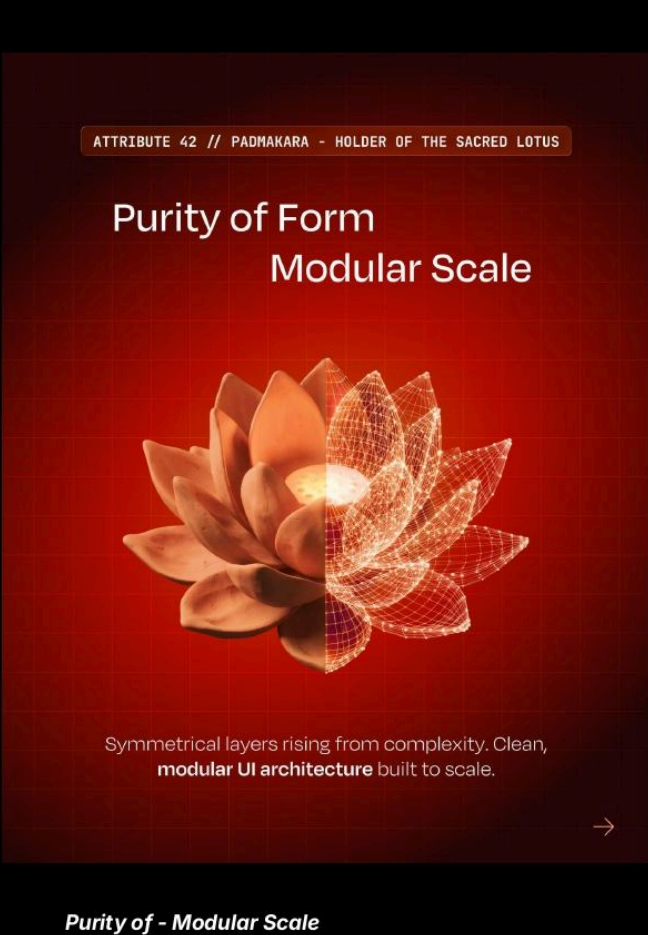
CAROUSEL EXECUTION



[ATTRIBUTE 28 // NADAPRATISHTHITA - ESTABLISHED IN SOUND]
System Resonance
Immediate Feedback
Acoustic signals set frequency. We design crisp micro-interactions and instant feedback loops.

System Resonance - Immediate Feedback

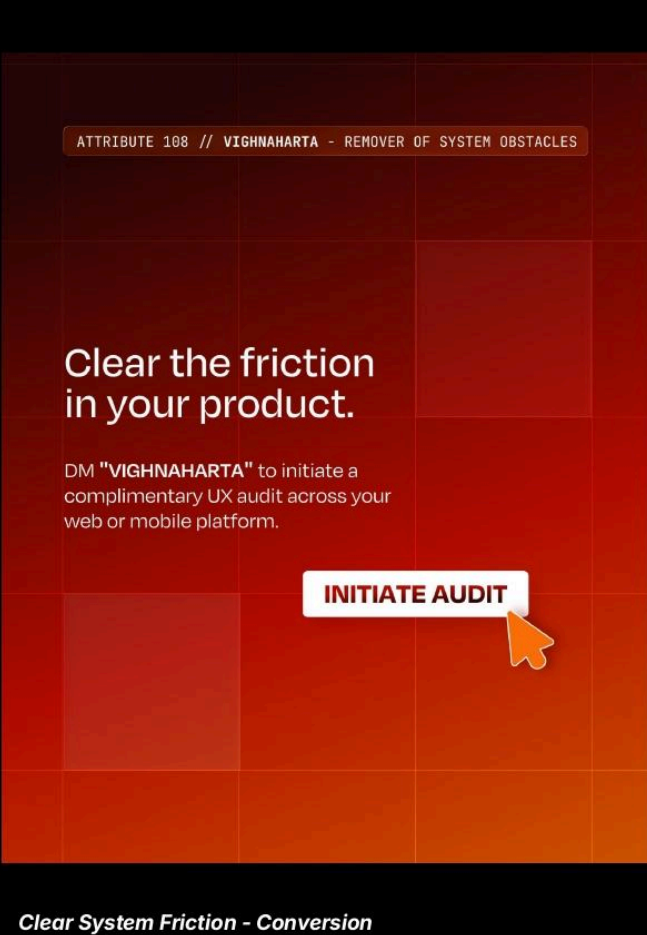
Acoustic signals from Bappa's bell mapped to crisp UI notification states and micro-interactions.



ATTRIBUTE 42 // PADMAKARA - HOLDER OF THE SACRED LOTUS
Purity of Form
Modular Scale
Symmetrical layers rising from complexity. Clean, modular UI architecture built to scale.

Purity of - Modular Scale

Sacred lotus symmetry translated into scalable, component-driven design systems.



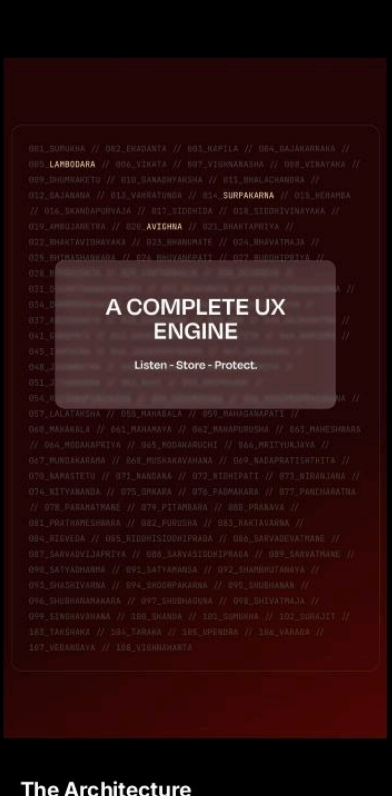
ATTRIBUTE 108 // VIGHNAHARTA - REMOVER OF SYSTEM OBSTACLES
Clear the friction in your product.
DM "VIGHNAHARTA" to initiate a complimentary UX audit across your web or mobile platform.
INITIATE AUDIT

Clear System Friction - Conversion

Bappa as the remover of obstacles - direct CTA to eliminate product UX friction via audit.

CAROUSEL EXECUTION

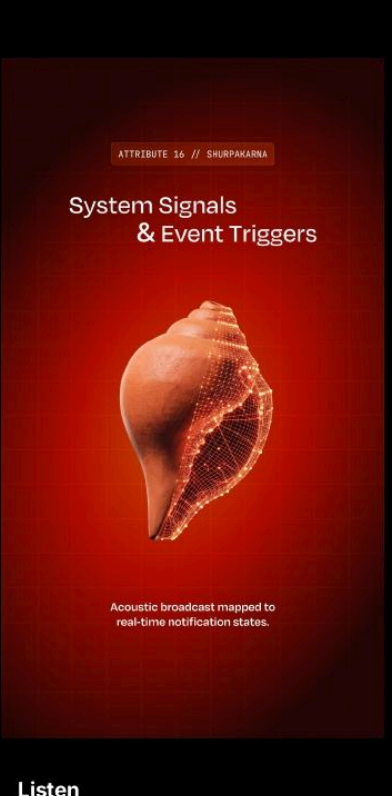
REEL FRAMES



A COMPLETE UX ENGINE
Listen - Store - Protect.

The Architecture

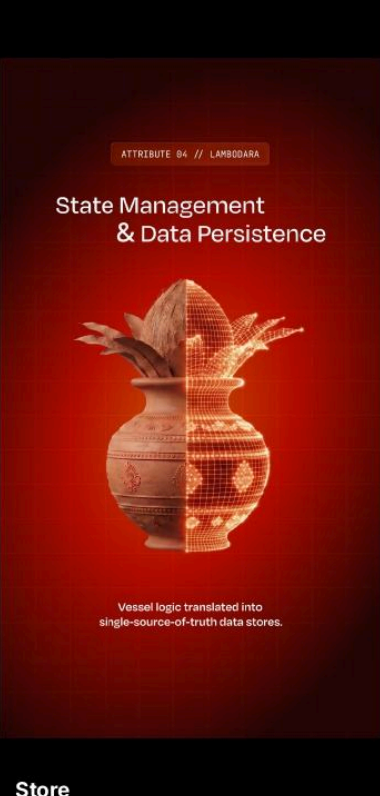
Highlighting the core design engine: *Listen, Store, Protect.*



ATTRIBUTE 16 // SHURPAKARNA
System Signals
& Event Triggers
Acoustic broadcast mapped to real-time notification states.

Listen

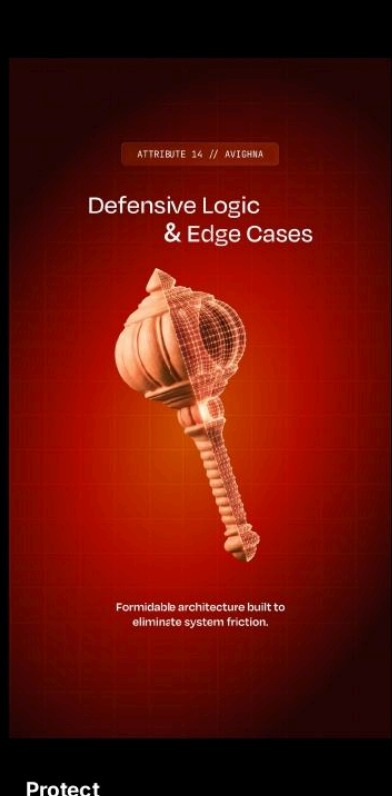
Capturing user interaction with real-time feedback loops.



ATTRIBUTE 04 // LAMBODARA
State Management
& Data Persistence
Vessel logic translated into single-source-of-truth data stores.

Store

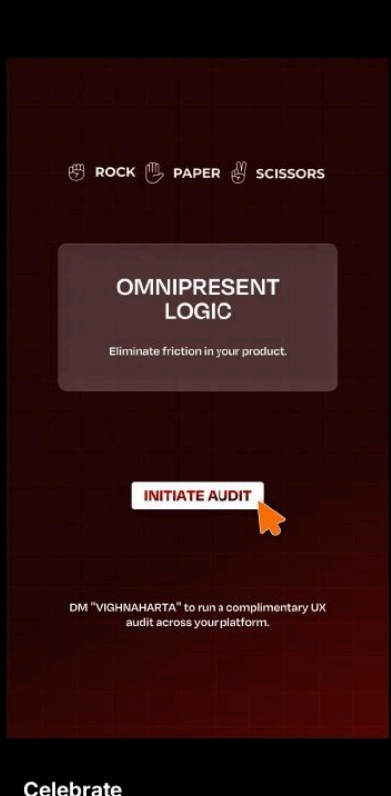
Encapsulating organic form into structured UI components.



ATTRIBUTE 14 // AVIGHNA
Defensive Logic
& Edge Cases
Formidable architecture built to eliminate system friction.

Protect

Shielding the product experience from friction and drop-off.

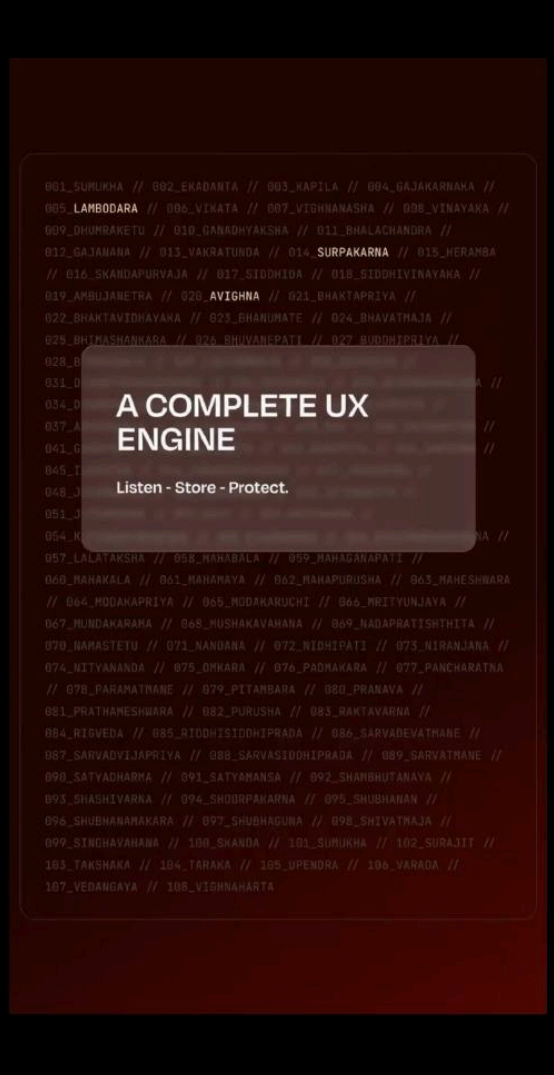


ROCK PAPER SCISSORS
OMNIPRESENT LOGIC
Eliminate friction in your product.
INITIATE AUDIT
DM "VIGHNAHARTA" to run a complimentary UX audit across your platform.

Celebrate

Launch day greeting with an immediate call to action.

REEL



A COMPLETE UX ENGINE
Listen - Store - Protect.

A 17-second technical storyboard mapping Ganesha's core attributes into a three-stage UX engine Listen (event triggers), Store (state management), and Protect (defensive logic).

CAMPAIGN BRIEF

The
OG
Architect

Concept

Deconstructing the 108 structural attributes of Ganesha into high-craft UI/UX engineering principles, positioning ancient structural wisdom as the ultimate foundation for modern digital systems.

Tone & Rule

High-tech, precise, and non-literal avoid religious design tropes and treat every element as a functional component of system logic, grid structures, or user feedback loops.

Campaign Identity

A technical, studio-artifact aesthetic combining dark obsidian code matrix backdrops (#0D0D0E), terracotta accents (#D96B43), and half-physical, half-wireframe 3D renders.

Execution Goal

Connect abstract cultural heritage to modern product design (auto-layout grids, micro-interactions, friction removal) to establish studio authority and drive UX audit sign-ups.

WORKFLOW OVERVIEW & PROCESS MAP

Stage	What happens	Typical time	Output / gate
01. Brief intake	*Clarify objective, audience, deliverables, platforms, deadline, constraints and decision-maker.*	1–2 h	*Approved brief + success criteria.*
02. Research	*Check cultural context, audience, visual references and platform requirements. Build a small reference board.*	2–5 h	*Reference set + initial design territory.*
03. Concept exploration	*Develop 1–2 strong routes. Test the idea against the brief before polishing.*	3–4 h	*Chosen creative route.*
04. System lock	*Lock type, colour, grid, image language and reusable rules before producing every asset.*	3–4 h	*Mini design system + master direction.*
05. Production	*Build the carousel, static and optional motion extension; adapt the system rather than redesigning each asset.*	6-8 h	*First complete creative set.*
06. Review	*Review concept, hierarchy, craft, consistency, copy and platform behaviour. Capture decisions and owners.*	2 h	*Revision list + approved changes.*
07. Handoff	*Check dimensions, copy, exports, filenames, links, source files and archive.*	3 h	*Final platform-ready package.*

TEAM DELEGATION & COLLABORATION

Junior Designer Delegation

- Provide scaffolded Figma starter kit (locked grids, color styles, and AI prompt matrix).
- Review using 4 specific lenses: Hierarchy, Grid Alignment, Contrast, and Scannability.
- Give actionable feedback (e.g., widening text frames to remove widow words).

Cross-Functional Alignment

- **UI/UX Team:** Validate component logic and design tokens against real Figma libraries.
- **Social/Content Team:** Align on LinkedIn PDF specs and VIGHNAHARTA lead triggers.
- **Dev Team:** Hand off code-ready SVGs, token values, and optimized reel MP4s.

AI + Human Craft Division

- **AI Role:** Rapid visual exploration, 3D asset generation, and copy variations.
- **Human Role:** Core concept, art direction, layout balance, typography, and final approval.

RUSH PROTOCOL (48-HOUR TURNAROUND)

20+ Hrs

NORMAL TIMELINE

- Explore 3 distinct visual directions with full mood boards.
- Custom render unique 3D assets for every single attribute.
- Multi-stage async reviews across departments.

48-Hrs

RUSH PROTOCOL

- Lock 1 core direction immediately in Stage 01 using pre-established design tokens.
- Use 4 master asset templates (Modak, Yantra, Bell, Lotus) and vary system metadata.
- Single 30-minute live sync review with key decision-makers for instant sign-off.
- Ship core carousel assets first; deploy motion extensions post-launch.
